

Greetings from the National Lymphoedema Framework Croatia (NLFC)

National Lymphoedema Framework Croatia is a non-profit organization run entirely by volunteers. We have a simple goal to improve the lives of patients suffering from lymphoedema in Croatia.

The most important way to achieve this is by helping patients and practitioners in Croatia access support in supplies needs and knowledge.

We have added the most value at this point by promoting lymphoedema awareness on local, regional, and national levels.

By establishing partnerships with different stakeholders and patient, supportive groups, NLFC helped in support and creating various pilot projects with different health care professionals to increase awareness of importance in lymphoedema care.

NLFC wants to continue in promoting, knowledge-share and empower support of patients' treatment in Croatia.

NLFC wants to thank the International Lymphoedema Framework for acceptance and support in recognising the importance of lymphoedema awareness in Croatia.

NLFC recognises its role as a unique area of expertise vital in maintaining and evolving better healthcare standards worldwide.

Yours sincerely,

Team, NLFC
