

International Lymphoedema Framework Japan

Greetings

The purpose of this branch is to introduce the resources published by the ILF to Japan and to promote the uniformization of Japanese lymphoedema management through academic activities such as participation in ILF meetings. We plan to establish a medical system that can prevent even a single patient from suffering from lymphoedema or any deterioration in quality of life caused by lymphoedema and disseminate Japanese excellent lymphoedema management technique to the world.

Online free-access journal
"Lymphoedema Research and Practice"

Description: To provide towards a better management of lymphedema and chronic oedema and related disorders. Original peer-reviewed articles examine these topics in hospital, home, and long-term care settings.
