mondiale du
lymphoedème (&lipoedème)
le 6 mars 2022*

Rencontrons-nous
(Patients et soignants)

le samedi 5 mars 2022

Auditoire de la maternité (CHUV) de 14h à 17h.

Entrée libre

The Swiss Lymphoedema Framework and LymphoSuisse

are organising a meeting for patients suffering from lymphoedema and/or lipoedema on the occasion of World Lymphoedema Day (& lipoedema).

The meeting will begin with an update on these conditions by Didier Tomson, physiotherapist and osteopath, President of the Swiss Lymphoedema Framework and Vice-President of LymphoSuisse. The manufacturers of compression devices will then have the opportunity to present their leading products and new products in short presentations. Following this informative part of the meeting, the floor will be given to patients. Testimonies will allow for exchanges between patients, between patients and caregivers with the aim of sharing experiences and trying to improve the quality of life and the therapeutic management of people with these diseases.

The organisers are looking forward to this meeting and hope to see many of you at this event.
